

Circle USD 375 District Improvement Plan

The Circle of Success

Vision

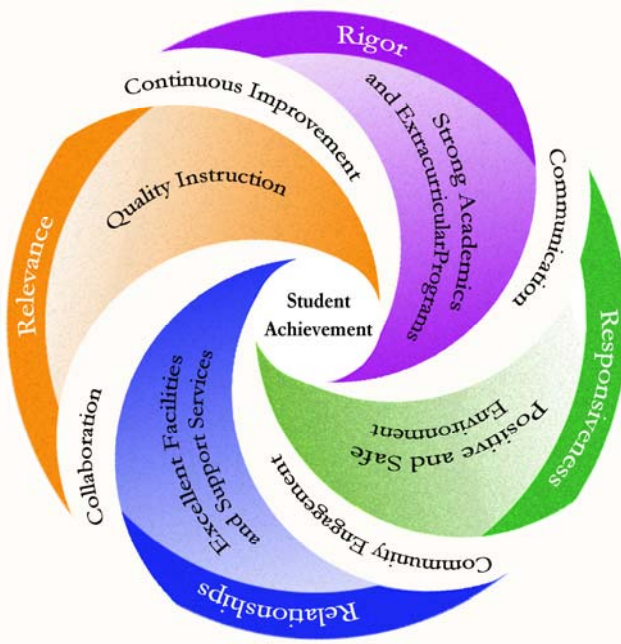

The vision and purpose of Circle USD 375, in partnership with our communities, is to educate each student to be an engaged, knowledgeable, responsible, and productive citizen in the 21st Century.

Mission

Circle USD 375 is committed to student success.

We Believe...

- Every student can be successful.
- Instruction must be provided for students who learn at different rates, in different ways and in different settings.
- Education is a cooperative effort among the BOE, all staff, students, parents and communities.
- High expectations and a safe, positive learning environment are essential for student success.
- A well rounded curriculum built upon essential learnings and research based practices is crucial to enhanced learning.
- Shared and collaborative decision making is essential improvement.

Student Success is at the center of all that we do and will remain our top priority.

Our three goals are: Implementation of the KESA process, Curriculum alignment using essential learnings as a framework and creating positive and productive relationships.

There are four intentional pursuits that will drive our work; Rigor, Relevance, Responsiveness, and Relationships. Relationships and relevance will be the highest priority with goal setting in each building within those areas.

Mission: Circle USD 375 is Committed to Student Success

A: Student success is at the center of all that we do and will remain our top priority.

B: Staff will hold high expectations for learning in all content areas which will be focused on post-secondary education.

C: Students will be engaged learners developing productive work ethic skills. They will participate in learning beyond the K-12 classroom.

D: Students will demonstrate technical literacy and 21st century learning skills.

E: Students will be recognized for accomplishments in academics, activities, and demonstrated citizenship.

Goal 1: Year 1 implementation of the Kansas Education Systems Accreditation (KESA) using a collaborative approach from all staff.

Goal 2: Begin processes of K-12 curriculum alignment across all buildings using collaboration and essential learnings as a framework.

Goal 3: Build and sustain positive and productive relationships with students and families to enhance the educational experience.
